## SUMMARY

Glucosamine AJF (Advanced Joint Formula) is a special formulation of several natural ingredients that have been found to contribute to joint health. Glucosamine stimulates the body's manufacture of collagen, the protein portion of the fibrous substance that holds joints together and provides shock-absorbing cushion. Chondroitin sulphate is synergistic with glucosamine. The combination is a popular and well-established nutritional formula that millions of people have found to be a beneficial addition to their supplement programs. Devil's claw and shark cartilage extract have also been added. Glucosamine AJF is an exclusive formula and the perfect product to help nourish the skeletal system!\*

## BENEFITS

Various factors, such as a varied diet or exercise, keep our joints moving. An elastic cartilage layer plays a particularly important role as a shock absorbing protection between bones and cartilage.

Glucosamine AJF contains specific nutrients that can support the elasticity of a healthy cartilage.

- ✓ Innovative blend of specific nutrients to maintain the elasticity of a healthy cartilage
- ✓ Glucosamine and chondroitin – two nutrients that are naturally present in the body and support cartilage growth
- ✓ Selected plant extracts support the functions of a healthy cartilage
- ✓ Glucosamine AJF contains specific nutrients to help your body maintain its own cartilage production.

## RECOMMENDED USE

Take 2 capsules of Glucosamine AJF daily with water at a meal time. More than the recommended use should not be consumed.

## INGREDIENTS

Glucosamine, chondroitin, Devil's Claw Powder, shark cartilage extract, gelatin and magnesium salts of fatty acids.

GLUCOSAMINE AJF®	
NUTRITIONAL INFORMATION PER SERVING	%DAILY VALUE*
GLUCOSAMINE HYDROCHLORIDE	600 mg
CHONDROITIN SULFATE	300 mg
PROPRIETARY BLEND	278 mg
DEVIL'S CLAW ROOT	
SHARK CARTILAGE EXTRACT
