SUMMARY

The circulatory system works like the body's superhighway, transporting the essential nutrients and fuel for our bodies to function properly. Circulation facilitates many aspects of human health and wellbeing, and proper blood flow and viscosity also make it easier for the heart to pump nutrients through the body. Increased circulation correlates with increased energy, better stamina, and improved mental alertness and memory recall. Enhanced circulation might also mean an enhanced mood and a greater feeling of vitality.

Unicity Renew, along with improved diet and exercise, helps support a healthy circulatory system.
