25746 (NL / PCO ONLY: IT)

**CONTENTS:** 92G POWDER (30 SERVINGS)

## NATURALLY FEEL THE BALANCE

Super Green is a product containing gentle concentrated chlorophyll, in the form of chlorophyllin from alfalfa, and niacin, in the form of niacinamide. Niacin, or vitamin B3, is a water-soluble vitamin. Good sources of niacin in our diet include: yeast, meat, poultry, red fishes (e.g. salmon and tuna), legumes, Chlorophyll leafy vegetables, and seeds.

### NIACIN CONTRIBUTES TO THE:

- ✓ Reduction of tiredness and fatigue
- ✓ Normal energy release for the body to use
- ✓ Normal functioning of the nervous system
- ✓ Normal psychological functioning
- ✓ Maintenance of normal mucous membranes
- ✓ Maintenance of normal skin

Chlorophyll is the life blood of plants. This is vital because of its ability to turn sunlight into energy. Super Green contains concentrated chlorophyll.

Acids and bases are natural products of our digestive system. Complex body systems help keep the ratio between acids and bases in balance and maintain a healthy pH value. Although both acids and bases contain important nutrients for the body, excess acids can create an unhealthy imbalance resulting in irregular digestion, lack of energy, a slower metabolism, pale and dull skin, and tiredness.

## RECOMMENDED USE

Mix one scoop with approximately 200ml-500ml non-sparkling water in a shaker. Shake well and drink. Take one to three times daily. A scoop comes along with the product and equals approximately one teaspoon.

## INGREDIENTS

Maltodextrin, chlorophyllin, Niacinamide

### SUPER GREEN

One serving equals 12 kcal (51kJ) and contains 1,8g of carbohydrates when prepared with water.
